*operating room*

*summary*

Designed to meet the growing need for same day surgeries, Spectrum Health Hospital’s Outpatient Surgery Facility brings state of the art technology to Western Michigan. AMDG worked closely with Spectrum Health in designing a facility that provides services consisting of general surgery, orthopedic, podiatry, urology and gynecology with the ability to add other specialties. Five operating rooms are equipped with laparoscopic and arthroscopic equipment with the flexibility to expand to eight operating rooms. AMDG and Spectrum Health desired to provide a non-institutional, warm, patient friendly environment with a smooth flow for patients, physicians, staff and equipment.
