## summary

The people of Chapel Pointe wanted their new church facility to be a welcoming architectural expression of their unique vision for evangelism and community. A.M.D.G. Architects worked closely with the Building Committee and provided a master plan with a phased approach that would meet Chapel Pointe’s present needs while planning for growth and new ministry opportunities in the future. Phase I includes a multi-purpose/worship area seating 600 people, space for adult, youth and children’s programs, nurseries and offices. Phase II includes a 1,500 seat worship area, a separate youth facility and additional support spaces.
