- interior design: Custer Office Environments
- cost: \$2.26 million

interior entry

new entrance

## summary

This church community needed to add on to and renovate their current facility in order to better meet a variety of needs. Care was taken to blend the new construction and renovations with the existing church building in order to preserve its architectural integrity. The design solution opened up the space on the lower and main levels, providing a fellowship area on the main level off of the sanctuary and a new entry and extension of the handicapped entry canopy. Other construction included renovation of offices, conference room/library, preschool, nursery, and Sunday School rooms. Also provided was an efficient and unobtrusive air conditioning system for the sanctuary.
